TRANSFORMER 28-4G

by BAUER BIOTEC

was tested and inspected using radiesthetic methods from June 3 to June 12 2015 at Triebweg 7, 61389 Schmitten, Germany. The initial ambient energy on June 3 was 3000 BOVIS (BE)* and the life energy (Qi) had a value of 23%. After only one week of installing the TRANSFORMERS 28-4G, the energy values increased to

18.000 BOVIS

the life energy was 93%.

Measurements were conducted daily.

Conclusion: Although Feng Shui provides us with a wonderful tool to improve our living conditions, the TRANSFORMER 28-4G is a valuable and important addition to increase the energy quality lastingly and in a targeted manner.

Marianne Rattay

Chairman and Feng Shui Master

* Units of energy in BOVIS (BE) is a method that dates back to the French physicist Alfred Bovis who developed it using a radiesthetic pendulum.
